

CO3-AT2-LABORATORY PERFORMANCE

Name : V. Sree Pavithra Reddy

Reg no: 192465020

Q1

PROGRAM EDITOR

C++

RunSave

```
1 #include <iostream>
2 using namespace std;
3 class student {
4     public:
5     student()
6     {
7         cout << "Constructor called\n";
8     }
9     ~student()
10    {
11        cout << "destructor called";
12    }
13 };
14 int main()
15 {
16     student s;
17     return 0;
18 }
```

OUTPUT

```
Constructor called
destructor called
```

Q2

QUESTIONS 5 / 5 completed

Rectangle ▾

RECTANGLE

Write a C++ program to create a class for a rectangle with a constructor and a destructor.

PROGRAM EDITOR

C++ ▾

Run Save

```
1 #include <iostream>
2 using namespace std;
3 class rectangle {
4     public :
5     rectangle()
6     {
7         cout << "rectangle constructor called\n";
8     }
9     ~rectangle()
10    {
11        cout << "rectangle destructor called";
12    }
13 };
14 int main()
15 {
16     rectangle r;
17     return 0;
18 }
```

INPUT

Your INPUT goes here!

OUTPUT

```
rectangle constructor called
rectangle destructor called
```

Q3

QUESTIONS 5 / 5 completed

Car

CAR

Write a C++ program to create a class for a car with a constructor and a destructor.

C++

Run Save

```
1 #include <iostream>
2 using namespace std;
3 class car {
4     public:
5     car()
6     {
7         cout << "car constructor called\n";
8     }
9     ~car()
10    {
11        cout << "car destructor called";
12    }
13 };
14 int main()
15 {
16     car c;
17     return 0;
18 }
```

INPUT

Your INPUT here!

OUTPUT

```
car constructor called
car destructor called
```

Q4

QUESTIONS 5 / 5 completed

Bank

BANK

Write a C++ program to create a class for a bank account with a constructor and a destructor.

PROGRAM EDITOR

C++

Run Save

```
1 #include <iostream>
2 using namespace std;
3 class bank {
4     public :
5     bank()
6     {
7         cout << "bank constructor called\n";
8     }
9     ~bank()
10    {
11        cout << "bank destructor called";
12    }
13 };
14 int main()
15 {
16     bank b;
17     return 0;
18 }
```

INPUT

Your INPUT here!

OUTPUT

```
bank constructor called
bank destructor called
```

Q5

QUESTIONS 5 / 5 completed

Book

BOOK

Write a C++ program to create a class for a book with a constructor and a destructor.

PROGRAM EDITOR

C++

Run Save

```
1 #include <iostream>
2 using namespace std;
3 class book {
4 public :
5     book ()
6     {
7         cout << "book constructor called\n";
8     }
9     ~book()
10    {
11        cout << "book destructor called";
12    }
13 };
14 int main()
15 {
16     book b;
17     return 0;
18 }
```

INPUT

Your INPUT goes here!

OUTPUT

```
book constructor called
book destructor called
```
